EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jori R. Schiffman on March 1, 2006.

The application has been amended as follows:

Amend claim 1 to read:

1. (Currently amended) A system for monitoring, configuring, programming and/or diagnosing operation of at least one vehicle, comprising:

an on-board unit disposed on the vehicle to send and receive data corresponding to at least one vehicle operating characteristic;

a plurality of modular applications, each application having an associated function that processes the data corresponding to said at least one vehicle operating characteristic obtained via the on-board unit; and

an interface that allows selection among the plurality of modular applications to create a customized system;

wherein each of the modular applications comprises an application selected from the group of applications consisting

Art Unit: 3661

of third-party applications, system-supplied applications, and core services, at least one of the third-party applications and system-supplied applications functioning using information from at least one core service; and

wherein the core services include a get stored values service that outputs at least one vehicle controller value in response to a request, wherein the get stored values service outputs a current vehicle controller value if the vehicle controller is available at the time of the request and output a stored vehicle controller value in the on-board unit if the vehicle controller is not available at the time of the request.

Cancel claim 6.

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose detecting a request for a vehicle controller value, outputting a current vehicle controller value if a vehicle controller is available at the time of the request; and output a stored vehicle controller value if the vehicle controller is not available at the time of the request.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
